ISHANISM

Integrity | Synergy | Hard work | Agile | Novelty | Invincibility | Social Responsibility | Meritocracy

In the year 2000, during the dot-com revolution, **Ishan Technologies** was founded in Gujarat. Today, it stands as a formidable force in the Information Technology and Telecom sectors with a strong pan-India presence.

Ishan Technologies is a pan-India ICT enterprise offering secure, scalable digital infrastructure across Retail, Enterprise, and Government sectors. With **1800+ professionals in 100+ locations**, we bring deep technical expertise and real-world insight to every solution. Our dual strength as an ISP and System Integrator allows us to deliver customized, end-to-end digital transformation, at Ishan, we deliver bespoke solutions that are uniquely yours.

Ishan Infotech Ltd. – Delivers system integration, cloud computing, data center architecture, and cybersecurity. **Ishan Netsol Pvt. Ltd**. – Specializes in broadband, leased lines, MPLS, SD-WAN, SASE, and cloud connectivity.

Over the **past 20+ years**, we have diversified significantly. From providing simplified technology and digital infrastructure solutions to reliable and secure network services, **Ishan Technologies** has established a prominent position in the market. We serve a wide range of industries and cater to some of the nation's most prestigious brands. Our commitment to delivering on the most stringent SLAs, with the shortest downtimes, quickest turnarounds, latest technologies, and adaptability, has remained consistent.

We are committed to fostering a culture that celebrates diversity, equality, and inclusion. We firmly believe in the power that arises from embracing different perspectives and backgrounds.

We are hiring for the following position of **Product Implementation Engineer** to join our growing team at **Ishan Technologies.**

Employment Type: Internship followed by PPO.

Job Profile: • Design and implement scalable, high-performance integrations between Sprinklr and client systems.• Build, test, and maintain backend systems, APIs, and data pipelines using Java, Node.js, Python, or TypeScript. • Collaborate with solution consultants and product teams to customize and deploy Sprinklr's modules across different customer domains (Services, Insights, Marketing, Social). • Perform system debugging, troubleshooting, and performance optimization. • Configure data ingestion, analytics integration, and workflow automation to meet client-specific use cases • Work with databases (MongoDB, Redis) and manage caching, authentication, and search utilities (Elasticsearch).
• Ensure high-quality implementation with detailed documentation and support handover.

Job location: Pune & Ahmedabad.

Joining: The selected candidates must join from Jan/Feb 2026 for the internship.

Probation & Training Period: 1 Year
